

Committee to Unleash Prosperity

Survey of 1,000 Elites

September 11-26, 2023

1 To fight climate change, a proposal has been made that would impose strict restrictions and rationing on the private use of gas, meat, and electricity. Would you favor or oppose strict rationing of gas, meat, and electricity?*

Totals		
	Voters	Elites
Strongly favor	8%	49%
Somewhat favor	20%	28%
Somewhat oppose	21%	10%
Strongly oppose	42%	12%
Not sure	8%	2%

Methodology

This survey of 1,000 Registered Voters was conducted online by Scott Rasmussen on September 11-26, 2023. Field work for the survey was conducted by RMG Research, Inc.

Elites were defined as having a postgraduate degree, having a household income of more than \$150,000 annually, and living in a zip code with more than 10,000 people per square mile. Approximately 1% of the total U.S. population meets these criteria.

These parameters were determined after the observation of numerous surveys indicated that these elite segments of the population consistently exhibited views that were distinct from the general population. The sample was lightly weighted by gender, age, and race to reflect the demographic profile established through surveys of Registered Voters.

Seventy-eight percent (78%) of voters in this sample were Democrats and 17% were Republicans (in both cases, these totals include leaners).

The margin of sampling error for the full sample is +/- 3.1 percentage points.
