

Napolitan News Service Survey
of 1,000 Registered Voters
Conducted May 14-15, 2025

1 Pharmaceutical companies say that profits from drug sales allow them to do more research that creates new and better drugs leading to longer and healthier lives. If the companies are forced to lower prices, will that reduce the number of new and better drugs created?*

31%	Yes
45%	No
24%	Not sure

2 In some countries, the government pays for most health care, so they can refuse to buy drugs that they think are too expensive. Would it be good or bad for Americans if the government paid for most health care and could decide what drugs would or would not be available?*

19%	Very good
31%	Somewhat good
23%	Somewhat bad
15%	Very bad
12%	Not sure

3 Are prescription drugs expensive primarily because of the high costs of research and development, excessive government regulations, or the greed of pharmaceutical companies?*

17%	The high costs of research and development
20%	Excessive government regulations
56%	The greed of pharmaceutical companies
7%	Not sure

Napolitan News Service Survey
of 1,000 Registered Voters
Conducted May 14-15, 2025

Methodology

This survey of 1,000 Registered Voters was conducted online by Scott Rasmussen on May 14-15, 2025. Field work for the survey was conducted by RMG Research, Inc. Certain quotas were applied, and the sample was lightly weighted by geography, gender, age, race, education, internet usage, and political party to reasonably reflect the nation's population of Registered Voters. Other variables were reviewed to ensure that the final sample is representative of that population.

The margin of sampling error for the full sample is +/- 3.1 percentage points.

This survey was paid for by Napolitan News Service as part of the service provided for our Gold Circle Members.
