Scott Rasmussen National Survey of 1,000 Registered Voters Conducted June 17-18, 2024

1 Do people have “natural rights” that cannot legitimately be taken away by any government?
Or do individual rights and freedoms come from the government?*

- 78% People have natural rights which cannot legitimately be taken away
- 15% Individual rights and freedoms come from the government
- 7% Not sure

2 Is it more important for the federal government to have the power to do whatever most voters want, or for the power of the federal government to be limited to protect the rights and freedoms of individual Americans?*

- 33% For the federal government to have the power to do what voters want
- 57% For the power of the federal government to be limited to protect individuals
- 10% Not sure

3 Which is a bigger threat to the nation: a federal government that is too powerful or a federal government that is not powerful enough?*

- 66% A federal government that is too powerful
- 25% A federal government that is not powerful enough
- 9% Not sure

GOLD CIRCLE MEMBERS

Scott Rasmussen National Survey of 1,000 Registered Voters Conducted June 17-18, 2024

4 Is it more important for the federal government to set uniform rules that apply to the entire nation or for state and local governments to establish rules that best reflect the circumstances in their own areas?*

32%	For the federal government to set uniform rules
61%	For state and local government to establish rules that reflect their circumstances
8%	Not sure

Methodology

This Counterpolling™ survey of 1,000 Registered Voters was conducted online by Scott Rasmussen on June 17-18, 2024. Field work for the survey was conducted by RMG Research, Inc. Certain quotas were applied, and the sample was lightly weighted by geography, gender, age, race, education, internet usage, and political party to reasonably reflect the nation's population of Registered Voters. Other variables were reviewed to ensure that the final sample is representative of that population.

The margin of sampling error for the full sample is +/- 3.1 percentage points.

This survey was paid for by RMG Research, Inc. as part of the service provided for our Gold Circle Members.
