4 Imagine for a moment that we had a perfectly fair system of elections and that the number of Republicans and Democrats in Congress today precisely matched the share of votes cast for each party in the last election. If the share of Congressmen reflected the votes that were cast, would there be more Republicans in Congress than there are today, or more Democrats?*

- 33% More Republicans than there are today
- 33% More Democrats than there are today
- 9% The same numbers as there are today
- 25% Not sure

Total			
	More Republicans	More Democrats	Net
April 6-7, 2026	33%	33%	EVEN
October 15-16, 2025	35%	30%	R+5
August 13-14, 2025	35%	28%	R+7

5 In a number of states, the party in control of the state legislature is redrawing congressional districts so that their party will have more members of Congress. Is it appropriate for a state legislature to redraw congressional districts to gain extra seats in Congress for its party?*

- 23% Yes
- 56% No
- 21% Not sure

6 Some states have argued that they need to redraw their congressional districts to balance out other states that have redrawn their districts to favor the other party. If one state deliberately skews its congressional district to favor a party, is it appropriate for another state to deliberately skew its congressional districts to favor the other party and provide balance?*

35%	Yes
40%	No
25%	Not sure

Methodology

This survey of 1,000 Registered Voters was conducted online by Scott Rasmussen on April 6-7, 2026. Field work for the survey was conducted by RMG Research, Inc. Certain quotas were applied, and the sample was lightly weighted by geography, gender, age, race, education, internet usage, and political party to reasonably reflect the nation's population of Registered Voters. Other variables were reviewed to ensure that the final sample is representative of that population.

The margin of sampling error for the full sample is +/- 3.1 percentage points.
